

Metaldehyde Amnesty

Free Metaldehyde Replacement with Ferric Phosphate

First come, first served. Limited timed.

Upper Wensum and Upper Wissey catchments

Anglian Water is working with farmers to protect the quality of our rivers and reservoirs. We want to reduce the risk of metaldehyde entering these two important drinking water sources by removing metaldehyde from farms to avoid applications this autumn.

**Removal of
Metaldehyde
products
from farm**

**Replaced
with Ferric
Phosphate
product**

**FREE*
of

TERMS AND CONDITIONS:

Your farmland or chemical store must fall within the required catchments. Offer is limited between the dates specified and limited to an undisclosed number of applicants. It is based on a first come first served basis. It is only open to farmers and growers. It is not open to commercial firms engaged in waste disposal or for the disposal of waste. Any waste which is collected and found not to be covered by the scheme will not qualify for free disposal or ferric phosphate replacement. The contact window closes 31st January 2022 but may be extended after this date at Anglian Water's discretion.
