

## **CUSTOMER CODE OF PRACTICE FOR MANAGING WASTE STREAMS**

**PESTICIDE CANS** must be triple rinsed and collected in the bag provided.

**FOILS AND CAPS** must be removed and placed in the 50-litre bag provided. This bag should be tied and placed inside the larger bag with the pesticide cans.

**SLUG PELLET BAGS AND DRY FLOWABLE PESTICIDE BAGS** should be bundled together with paper bags being put first into a 200 litre bag then placed in the bag with the pesticide cans.

On collection or delivery to the hub, all **BAGS OF PESTICIDE CANS** should be tied and marked with the contract number in black marker pen.

**SEED BAGS AND FERTILISER BAGS** should be placed inside one another or tied in manageable bundles.

**CARDBOARD** should be flat packed and either stacked and tied in bundles or placed in a fertiliser or seed bag.

**SILAGE WRAP AND CROP COVER** needs to be dry and free from as much contamination as possible and put in the appropriate bag provided.

**POLYTHENE SHEET AND SHRINK WRAP** should be rolled up, put into the bags provided and tied off.

**STRING OR NET WRAP** should be placed into the bag provided and tied off.

**OIL FILTERS, AIR FILTERS AND FUEL FILTERS** can be put into the resealable drum provided or smaller quantities can be placed in a 50-litre bag and tied to prevent leakage.

**GREASE GUN CARTRIDGES AND OILY RAGS** can be put together into the resealable drum provided or smaller quantities can be placed in a 50-litre bag and tied.

**SPENT SHOTGUN CARTRIDGES** can be brought into us for recycling in 50 litre or 200 litre bags.

**OTHER RECYCLABLE WASTE** can often be accommodated, please ask before co-mingling with any of the other waste streams above.
